

How to set the caching header in VB.NET/ASP.NET

Thursday, 26 February 2009

To add a cache header in VB.NET you can use

```
Response.Cache.SetExpires(DateTime.Now.AddSeconds(360))Response.Cache.SetCacheability(HttpCacheability.Public)  
Response.Cache.SetSlidingExpiration(True)
```

for more information on caching and other caching methods
