

## Java5 iterator for loop syntax

Wednesday, 01 April 2009

Last Updated Sunday, 22 November 2009

There is a new collections iterator loop within java.

The syntax is

```
for(Item theItem: Items)
{
    ... use theItem
}
```

you can find more info about this at <http://java.sun.com/j2se/1.5.0/docs/guide/language/foreach.html>
