

Creating cross subdomain cookies in VB.NET

Saturday, 15 November 2008

Last Updated Wednesday, 31 December 2008

In order to create a cross domain cookie within VB.NET you need to set the .domain element of the cookie

for example

```
Response.Cookies("domain").Value = DateTime.Now.ToString()  
Response.Cookies("domain").Expires = DateTime.Now.AddDays(1)  
Response.Cookies("domain").Domain = "programmingtips.co.uk"
```

Would allow the cookies to be read from both www.programmingtips.co.uk and forum.programmingtips.co.uk - however not from www.grahamrobinsonsoftware.co.uk

There is a good article on creating VB.NET cookies at <http://www.go4expert.com/forums/showthread.php?t=14605>
